Managing stress in sports competition means that someone manages, controls and reduces the occurrence of negative stress conflict. The main sources of stress are the athlete's hopes; what you hope to achieve or win in the competition; Fear of failure, anger, frustration, injury, discomfort you would like to avoid. Another stressful situation includes the demand for crows, muscle tension, more motivation and inability to cope with sensory information.

"National Seminar on Ferroelectrics & Dielectrics" (NSFD-2021) biennial Dielectrics Conference, initiated by the Dielectrics and Ferroelectrics group in India in 1980; has successfully completed 40 years of journey since its humble beginning at Indian Institute of technology Delhi. Dielectrics class of materials also referred as polar materials, include Piezo, pyro and ferroelectrics materials, play key role in modern technology, finding its applications in data storage, energy harvesters and wireless communications. This symposium will address developments in materials for a wide range of related technologies. It will bring together expert from diverse discipline and broadly cover materials and device related in the field. Special tutorial sessions will be arranged for young researchers and initiators to provide core research information. The Topics of Seminar is broadly classified into five areas.

I. Fundamentals of dielectrics, ferroelectrics & related materials

- Relaxor and birelaxor ferroelectrics/dielectrics and disorder effects
- Ferroelectric tunneling junctions, ferroelectric and magnetoresistive barriers.
- Domain and domain wall engineering (functional domain walls)
- Ionic and electronic phenomena in ferroelectrics
- Surface and interface tailoring and basic emergent phenomenaTopological states
- Topological states
- Multiferroics & magnetoelectrics, magnetoresistive phenomenon

II. Materials design and processing

- Bulk materials, Thin films, heterostructures, composite, nanofibers and multilayers
- Textured materials
- Film processing technologies (preparation, characterization)
- Patterning methods (net-shape forming, microfabrication)
- Biomaterials and Lead-free systems
- Hybrid materials
- Low-energy sintering

III. Characterization of polar materials

- Fundamental phenomena probed by scattering techniques (X-ray and neutron scattering)
- Electron microscopy (surface and interface phenomena, in-situ studies of domain switching)
- Raman and optical spectroscopies
- Local phenomena by scanning probe microscopic techniques
- Optical near-field imaging
- Spectroscopic probing of electrochemical phenomena
- Electrical and electromechanical characterization

IV. Applications of ferroelectrics and dielectrics

- Dielectrics, Ferroelectrics and antiferroelectrics for energy applications
- Medical ultrasound transducers, ultrasound actuators, and sensors for harsh environments, sound absorption materials
- Ferroelectric memory materials and devices
- Piezoelectricity (high-performance and lead-free piezoelectrics, piezoelectric polymers, MEMS and other integrated piezo-devices, sensors and actuators)
- Pyroelectric materials and devices
- Optical phenomena tuning: photonic band-gaps, luminiscence and phosphoresces materials
- Biomaterials (hydroxyapatite, polypeptides, etc.)
- Relaxor dielectrics, ferroelectrics and smart materials

V. Theoretical modelling in dielectrics

- Phenomenological Analysis of dielectrics and ferroelectrics
- Nonliarity and scaling behaviour in non-linear dielectrics

RTMNU Nagpur

Nagpur University was established on 4th August, 1923 with six affiliated colleges and 927 students. During 1947, the number of students increased to about 9000 accompanied by the improvement and diversification of curricula and expansion in the range of subjects. It was in 1958 that some new Departments in Arts and Social Science faculties were opened; the major expansion, however, came in 1963 when several science and other teaching Departments were started. The Departments were shifted to spacious buildings in the main campus in 1972-73. During ninety years of its existence, the University has progressed satisfactorily and doing well in the midst of constraints of different sorts. This has been possible because of futuristic vision about higher education of the personalities who adored the chair of Vice-Chancellor of this University. Their determination and dedication helped a lot in progress of this University.

Presently University comprises of Thirty-nine Postgraduate Teaching Departments (PGTD), three Constituent Colleges/Institutions (Law college, Laxminarayan Institute of Technology, and College of Education). Eight hundred forty-two colleges are affiliated The Department and conducted college/Institution buildings are spread over in 11 campuses with an overall area of 318 acres. Following programs under various faculties are run through the above-mentioned PGTD, Conducted College and Affiliated Colleges.

Department of Physics

The Department came into existence in 1963 along with other Science Departments for imparting post-graduate education and for promoting research. Research activities of the Department are mostly focussed on materials science research and have grown steadfastly since its inception, expanding into areas of functional materials for Fuel Cell, batteries, Sensors and Energy harvesting materials and So on. Department is actively involved in R & D as well as consultancy project and has also collaborations with several R & D organization in the India namely UGC-DAE-CSR, Indore; RRCAT, Indore; NEERI, Nagpur; IISER, Pune etc as well as outside the India with Penn State University, State College, USA; Institute of Energy and Climate change, Forchunszentrum Julich GMBH, Germany. The laboratories are adequately equipped with State-of-Art facilities. Infrastructure comprises of wide variety of structural and Electric and dielectric Characterization for AC/DC measurement technique with high temperature characterization capability. Computational facility workstations with advance configurations are also available.

"National Seminar on Ferroelectrics & Dielectrics" (NSFD-2021) biennial Dielectrics Conference, initiated by the Dielectrics and Ferroelectrics group in India in 1980; has successfully completed 40 years of journey since its humble beginning at Indian Institute of technology Delhi. Dielectrics class of materials also referred as polar materials, include Piezo, pyro and ferroelectrics materials, play key role in modern technology, finding its applications in data storage, energy harvesters and wireless communications. This symposium will address developments in materials for a wide range of related technologies. It will bring together expert from diverse discipline and broadly cover materials and device related in the field. Special tutorial sessions will be arranged for young researchers and initiators to provide core research information. The Topics of Seminar is broadly classified into five areas.

I. Fundamentals of dielectrics, ferroelectrics & related materials

- Relaxor and birelaxor ferroelectrics/dielectrics and disorder effects
- Ferroelectric tunneling junctions, ferroelectric and magnetoresistive barriers.
- Domain and domain wall engineering (functional domain walls)
- Ionic and electronic phenomena in ferroelectrics
- Surface and interface tailoring and basic emergent phenomenaTopological states
- Topological states
- Multiferroics & magnetoelectrics, magnetoresistive phenomenon

II. Materials design and processing

- Bulk materials, Thin films, heterostructures, composite, nanofibers and multilayers
- Textured materials
- Film processing technologies (preparation, characterization)
- Patterning methods (net-shape forming, microfabrication)
- Biomaterials and Lead-free systems
- Hybrid materials
- Low-energy sintering

III. Characterization of polar materials

- Fundamental phenomena probed by scattering techniques (X-ray and neutron scattering)
- Electron microscopy (surface and interface phenomena, in-situ studies of domain switching)
- Raman and optical spectroscopies
- Local phenomena by scanning probe microscopic techniques
- Optical near-field imaging
- Spectroscopic probing of electrochemical phenomena
- Electrical and electromechanical characterization

IV. Applications of ferroelectrics and dielectrics

- Dielectrics, Ferroelectrics and antiferroelectrics for energy applications
- Medical ultrasound transducers, ultrasound actuators, and sensors for harsh environments, sound absorption materials
- Ferroelectric memory materials and devices
- Piezoelectricity (high-performance and lead-free piezoelectrics, piezoelectric polymers, MEMS and other integrated piezo-devices, sensors and actuators)
- Pyroelectric materials and devices
- Optical phenomena tuning: photonic band-gaps, luminiscence and phosphoresces materials
- Biomaterials (hydroxyapatite, polypeptides, etc.)
- Relaxor dielectrics, ferroelectrics and smart materials

V. Theoretical modelling in dielectrics

RTMNU Nagpur

Nagpur University was established on 4th August, 1923 with six affiliated colleges and 927 students. During 1947, the number of students increased to about 9000 accompanied by the improvement and diversification of curricula and expansion in the range of subjects. It was in 1958 that some new Departments in Arts and Social Science faculties were opened; the major expansion, however, came in 1963 when several science and other teaching Departments were started. The Departments were shifted to spacious buildings in the main campus in 1972-73. During ninety years of its existence, the University has progressed satisfactorily and doing well in the midst of constraints of different sorts. This has been possible because of futuristic vision about higher education of the personalities who adored the chair of Vice-Chancellor of this University. Their determination and dedication helped a lot in progress of this University.

Presently University comprises of Thirty-nine Postgraduate Teaching Departments (PGTD), three Constituent Colleges/Institutions (Law college, Laxminarayan Institute of Technology, and College of Education). Eight hundred forty-two colleges are affiliated The Department and conducted college/Institution buildings are spread over in 11 campuses with an overall area of 318 acres. Following programs under various faculties are run through the above-mentioned PGTD, Conducted College and Affiliated Colleges.

Department of Physics

The Department came into existence in 1963 along with other Science Departments for imparting post-graduate education and for promoting research. Research activities of the Department are mostly focussed on materials science research and have grown steadfastly since its inception, expanding into areas of functional materials for Fuel Cell, batteries, Sensors and Energy harvesting materials and So on. Department is actively involved in R & D as well as consultancy project and has also collaborations with several R & D organization in the India namely UGC-DAE-CSR, Indore; RRCAT, Indore; NEERI, Nagpur; IISER, Pune etc as well as outside the India with Penn State University, State College, USA; Institute of Energy and Climate change, Forchunszentrum Julich GMBH, Germany. The laboratories are adequately equipped with State-of-Art facilities. Infrastructure comprises of wide variety of structural and Electric and dielectric Characterization for AC/DC measurement technique with high temperature characterization capability. Computational facility workstations with advance configurations are also available.

The members of the club along with board members fed the domestic animals in their localities. As due to lockdown all shops and markets are closed due to which stray animals suffer. This activity is a social cause conveying the message of helping the needy in tough times. Members fed food and water to dogs, birds and cows.

VISIT TO HOSPITAL

Place-Indira Gandhi Rugnalaya, Nagpur

DATE:- 13/10/2018

A hospital visit was organized by college for the students of microbiology on the date of 13th of October, 2018. 45+16 students along with one teacher visited at the Indira Gandhi Rugnalaya at 10:30 pm. It was a quite big hospital when we entered the hospital we wear a mask our mouth and nose to avoid infection. First we visited the laboratory where all the work of staining of Tuberculosis was performed. Later the sir gave us demonstration on Tuberculosis. There are two types of Tuberculosis – Pulmonary Tuberculosis & Extra Pulmonary Tuberculosis, sir explained us that the Tuberculosis can happen in 2 or more organs at the same time. They explained us that Tuberculosis disease can be treated. The Indian Government is giving a free treatment to the patients of Tuberculosis but at some stages like MDR, HDR, TDR and diabetes they can't be treated as in such stages the Tuberculosis bacteria spread at all over the body of the patients because of which the patient's death rate of Tuberculosis has increased. After that Agrawal madam gave us the information about the Tuberculosis bacteria and the symptoms of Tuberculosis – There is cough for more than 2 weeks, loss of appetite and because of that loss of weight, sometimes the Tuberculosis infection in some patients causes about 20 kg loss of weight in one month, another symptoms of Tuberculosis is rise in temperature of body (fever) in evening. She explained us about its treatment by antibiotics – Isoniazid, Streptomycin and Rifampicin. She told us about its preventive measures to avoid Tuberculosis by regular diet and not to take fast food, junk food etc. She gave us the demonstration of staining of Tuberculosis and we observe the Tuberculosis bacilli under the microscope. She told us about another method of diagnosis of Tuberculosis by using Gene Technique, which gives result in 2 hours. Madam Agrawal explained us about different types of bacillus types of bacteria. It was a good experience to visit a hospital. It was a day of great learning for all of us.

Report

Rashtriya Swadeshi Surksha Abhiyan- Say no to china products

Dharampeth M. P. Deo Memorial Science College in collaboration with Vignyan Bharti organised a campaign on **Rashtriya Swadeshi Surksha Abhiyan- Say no to china products.** The main focus of this campaign was to create awareness amongst masses and an appeal for boycott of Chinese products. This campaign was organised in the interest of nation.

A lecture was arranged for the students to make them aware of this campaign. They were given information about the economical growth of china due to Indian market selling Chinese goods. Thus by saying no to china goods, and buying Swadeshi goods or products we can help to make our economy stronger, keeping in mind this fact , a visit to public places was arranged. The students were given pamphlets giving all information about economy of both countries and list of swadeshi products and were asked to distribute it amongst people.

A team of 17 volunteers from various groups participated for campaigning. The places selected for visits were NIT Complex, Majestic Heights covering near about 150 apartments. Approximately 60 -70 people had been contacted and were encouraged for boycott of Chinese products. The students were very enthusiastic; they interacted with the people and gave all the information about why to boycott Chinese products. These people appreciated the student's work and the response was very fantastic.

The students said they feel proud in doing such social work for nation's interest and said were always ready to do such kind of social work because it gives them a chance to learn about how to interact with people. The contribution of students was fabulous.

The team was headed by Dr.Vidya R. Kathoke (Dharampeth M. P. Deo Memorial Science College, Nagpur) and Dr. Pratiksha Patwari (Vignyan Bharti).
