## NAME OF THE ACTIVITY – PREPARATION OF FACE MASK.

### OBJECTIVES OF ACTIVITY

- 2) To make home made things more popular.
- 3) To save money on the part of the home maker/learner.
- 4) To make demonstration one of the teaching aids.
- 5) To create awareness about covid-19 pandemic and promote use of mask at public places.

### INTRODUCTION

To slow the spread of COVID-19, the ministry of AYUSH recommends wearing a mask or cloth face covering—particularly in places where it is impossible to maintain social distancing (staying at least 6 feet away from others). The government advises washing your hands thoroughly or using hand sanitiser before putting on and after taking off face coverings.

Mask making activity conducted on 28<sup>th</sup> of august 2021 for the students of semester 5.

### CONCLUSION

By showing such a demonstration it is a duty of a student's (as an extension worker) make rural people aware regarding use of mask at public places. Home maker should prepare homemade face mask and save money. They can start their own business.

### MEATHOD (MATERAIL REQUIRED)

- 1) A clean piece of cloth you can have the material — an old T-shirt, a faded dupatta, etc.
- 2) Materials • Two 10"x6" rectangles of cotton fabric • Two 6" pieces of elastic (or rubber bands, string, cloth strips, or hair ties) • Needle and thread (or bobby pin) • Scissors • Sewing machine.
- 3) Cut out two 10-by-6-inch rectangles of cotton fabric. Use tightly woven cotton, such as quilting fabric or cotton sheets. T-shirt fabric will work in a pinch. Stack the two rectangles; you will sew the cloth face covering as if it was a single piece of fabric.

- 4) Fold over the long sides  $\frac{1}{4}$  inch and hem. Then fold the double layer of fabric over  $\frac{1}{2}$  inch along the short sides and stitch down.
- 5) Run a 6-inch length of  $\frac{1}{8}$ -inch wide elastic through the wider hem on each side of the cloth face covering. These will be the ear loops. Use a large needle or a bobby pin to thread it through. Tie the ends tight. Don't have elastic? Use hair ties or elastic head bands. If you only have string, you can make the ties longer and tie the cloth face covering behind your head.
- 6) Gently pull on the elastic so that the knots are tucked inside the hem. Gather the sides of the cloth face covering on the elastic and adjust so the mask fits your face. Then securely stitch the elastic in place to keep it from slipping.

## केंद्रा बदल माहिती

रजत महोत्सवी बाल मार्गदर्शन केंद्राच्या सुरुवातीच्या काळात बाल मार्गदर्शन केंद्र चिकित्सात्मक दृष्टीकोणातून काम करत राहिले नंतर मात्र बदलत्या काळाची गरज ओळखून बालकांच्या व विद्यार्थ्यांच्या सर्वांगीण विकासासाठी विविध कार्यक्रमांचे आयोजन करण्यास सुरुवात झाली. मुलांनी केंद्रात येण्या बरोबरच 'मुलांपर्यंत पोहचणे' या उद्देशाने कार्यक्रमाचे आयोजन बालमार्गदर्शन व विद्यार्थी समुपदेशन केंद्रातर्फे आजही सुरु आहे.

### :ABOUT US:

FIELD ACTION PROJECT Known as Child Guidance Clinic started in 1977 in TCSW

In the initial stages of C.G.C. work was a clinical in nature. After Silver Jubilee of the centre. The objective and programmes were designed keeping in mind the need of changing scenario, and the student's overall development. Instead of waiting for children to reach the centre reaching out became the strategy of the centre. The centre offers child guidance and students counselling through various programmes organised as part of social work practicum as well as an independent centre. # THEME AND EXPECTED OUTCOMES OF THE WORKSHOP

“The real source of wealth and capital in this new era is not material things...it is the human mind, the human imagination, and our faith in the future.”

– Steve Forbes

We all know that in the 21st century, the cornerstones of the economy would be ideas, innovation and social empowerment that would drive the engine of growth and steer the country towards prosperity. This makes the theme of the workshop, “ Innovation, Social Entrepreneurship and IPR” more relevant today than it ever was before. The government has also introduced a number of reforms to fan the spirit of enterprise of the Indian youth and now the onus lies on Higher Education Institutions (HEIs) to provide a platform for the entrepreneurial aspirations of the young minds of the country. Learning cannot be divorced from innovation and we cannot expect to produce different results if we continue to do what we did yesterday. A paradigm shift is required in the field of higher education where the focus should be on producing more job creators rather than just job seekers, more leaders rather than mere followers. As is often said, in order to be a part of the solution, one should also be able to engage with the problems and address them. We cannot turn a blind eye to the fact that despite the demographic dividend that India enjoys, the vast potential of our youth’s entrepreneurial spirit and innovative fervor still remains untapped.

If the arena of innovation still remains barren in India, it’s not due to dearth of ideas but due to the fact that the research culture and innovation ecosystem in our Institutions still leave a lot of room for improvement. Even if a student has an idea with him, he doesn’t get the required guidance, support and mentorship from his teachers to convert his idea into a business proposition. This is because the teacher is as uninitiated and clueless as the student about the strategies and the business design required to take the idea forward and convert it into a “manufacturable and marketable form”. Thus, Many a brilliant idea with a potential to change our lives could never see the light of day. Who knows how many Steve Jobs and Bill Gates we could have produced if the idea could have been taken to its logical end? If we look around us, we can see how small ideas have changed the way we travel, the way we shop, the way we order food, the way we get our medicines etc. Many of these ideas have given rise to social enterprises which have touched the lives of our rural folk. The future eventually belongs to those who hold control over Intellectual Property. In an attempt to give a proper platform to the ideas of the young minds of the Region, Raman Science Centre, Nagpur, Vigyan Bharati, and Vidarbha Industries Association (VIA) have started the project Nutan Avishkar Vichar in Nagpur (NAVIN). Happy to share with you that some ideas of the students of the region are being funded and incubated by NAVIN. Hopefully, some of these end processes and products will also get patented and converted into start-ups.

Winston Churchill once said, “Never let a good crisis go to waste”. We can see the dark clouds looming in these unprecedented times but the only way to make the best use of the silver that lines these clouds is through the power of innovation. This National Workshop (WEBINAR) aims at addressing some of these issues, and especially the important role the Teachers can play in mentoring and encouraging our students.

We hope that this small initiative from us will trigger someone’s imagination culminating it into a very constructive contribution to our society at large. As Steve Jobs so aptly puts it, “Innovation has nothing to do with how many R&D dollars you have...it’s about the people you have, how you’re led and how much you get it.”

Photo Article Writing Competition

OBJECTIVES:-

- To develop the creative skills among students through prescribed text.
- To provide the students an opportunity to think out of box to understand a text.

OUTCOME:-

1. The activity will be fun learning experience for the learners.
2. It will be an innovative way of learning a prose and producing innovative results.

PERCEPTION:-

Students are from Science background and they get fewer opportunities to express creativity because of their academic pursuits. Innovative programmes make them release their stress and make them learn in a friendly way.

Department of Physics, Rashtrasant Tukadoji Maharaj Nagpur University, Nagpur and the Materials Research Society of India, Nagpur Chapter had jointly organized one week National School on Computer-Assisted Spectroscopic Data Interpretation Techniques (NSCSDIT - 2019) in collaboration with Shri Shivaji Science College and Dharampeth M. P. Deo Memorial Science College, Nagpur at Department of Physics, RTM Nagpur University during January 7<sup>th</sup> - 11<sup>th</sup>, 2019.

Department of Physics, RTM Nagpur University

The sole activity of the school was Hand-on training on Spectroscopic data interpretation softwares. Such type of activity is first time organized in India and is brain child of Convener Smita Acharya. The school is attended by 101 young scientists from IITs, NITs, IISER, State and Central Universities and CSIR research laboratories from all over India. The five days School consists of 1-planery talk, 14-Tutorials, 6 lab sessions, 3 popular talks and 24 posters presentation. Spectroscopic data fitting software Demeter, Full prof, Vesta, XPSPEAK, CASAXPS, Origin Pro, FIT2D and NOVA has been covered during hand-on training sessions. Desktop has been provided to each participant for the software training.

The school was inaugurated in presence of Dr S M Yusuf, Director Solid State Physics Division, Bhabha Atomic Research centre, Mumbai and Dr Sivswaroom, Divisional Director, IGNOU Nagpur. In Inaugural address Dr S M Yusuf has enlightened the young mind with his national initiative at BARC to start neutron diffraction research in India. He explained spectroscopy is back-bone of most of experimental techniques, the needs of such school to improve quality of research. The experimentation and data interpretation are basic pillars of research, understanding the correct ways of experimentations and accuracies of data interpretation is crucial to emerge out good quality of research output and make research world competitive. Dr Sivswaroop has also explained the Importance of data interpretation in experimental research with giving examples. The Convener of the School, Dr. Smita Acharya, Professor, Department of Physics RTM Nagpur University has introduced the theme of the school "spectroscopic methods have been the oldest experimental techniques used in Physics, Chemistry, Materials Science and few other branches. The knowledge of these techniques led to understand of fundamentals. The field of spectroscopy deals with the study of interaction of radiation with matter. There have been great developments in the instrumentation of spectroscopic techniques. Similarly with the advances of computer science the analysis of data collected from spectroscopic experiments has become faster, more accurate and highly sophisticated.

The scientific programme of the School has been conducted by eminent Scientist, Academician and industrial professional from IUC-DAE-CSR, Indore, BARC Mumbai, ICMET Pune,

**Department of Physics, RTM Nagpur University**

TIFR Mumbai, RRCAT Indore, IIT Kanpur, IIT Guwahati, Metrohm, Toshvin, Raga Tech, Pune, Hioki Electronics etc. Key-note address was delivered by Dr S M Yusuf, Director, Solid State Division BARC on topic understanding of Magnetic Phase transition by Neutron Diffraction. The details of technical programme is given below:
